

COOPER DISCOVERER CTS

R-TECH CONSTRUCTION

Response technology construction utilizes several design features that work in concert to provide enhanced tire performance.

INNOVATIVE 5 RIB ALL-SEASON TREAD DESIGN

The innovative 5 rib tread design incorporates numerous features to provide for excellent stability, traction and treadwear.

COUPLED SILICA TREAD COMPOUND

The chemically coupled silica and carbon black compound allows for superior wet traction without sacrificing tread wear. An optimized polymer matrix allows the compound to remain pliable at lower temperatures while contributing to lower rolling resistance.
